<b>Installation</b>	Driver / Passenger / Rear	Driver / Passenger / Rear
<b>Color</b>	Grey	Grey 
<b>Price</b>	749 €	899 €

- ROBUST MATERIALS FOR ALL WEATHER**  
 The durable PVC cover (1000D, 600 g/m<sup>2</sup>) reliably protects the awning when closed. The awning fabric made of 600D ripstop polyester with a 3000 mm water column withstands both sun and rain.
- INTEGRATED, DIMMABLE LIGHTING**  
 The integrated LED lighting in white and red provides both functional illumination and atmospheric lighting. White light ensures clear visibility when cooking or organizing, while red light preserves night vision, attracts fewer insects, and maintains a relaxed evening atmosphere.
- EASY SETUP**  
 Thanks to its smart design and included universal mounting hardware, the LEAF can be installed quickly and easily. In rain and wind, two telescopic poles provide additional stability.
- EXPANDABLE INTO A PROTECTED SPACE**  
 Matching side walls are available for both sizes. This allows you to quickly transform your awning into a sheltered, almost enclosed space – ideal in wind, rain, or when you want more privacy at the campsite.
