270° Awning LEAF
Item no.: VW-SA250-27L-GY

Weight

approx. 27 kg

Width closed

250 cm

Installation

Driver / Passenger

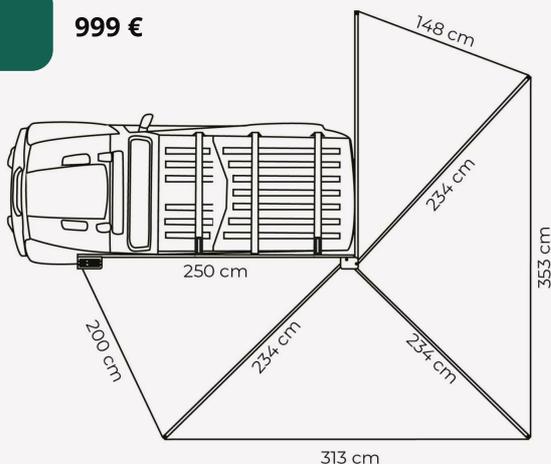

Color

Grey

Price

999 €

Highlights

- **ROBUST MATERIALS FOR ALL WEATHER**

The durable PVC cover (1000D, 600 g/m²) reliably protects the awning when closed. The awning fabric made of 600D ripstop polyester with a 3000 mm water column withstands both sun and rain.

- **INTEGRATED, DIMMABLE LIGHTING**

The integrated LED lighting in white and red provides both functional illumination and atmospheric lighting. White light ensures clear visibility when cooking or organizing, while red light preserves night vision, attracts fewer insects, and maintains a relaxed evening atmosphere.

- **QUICK INSTALLATION - READY TO USE**

With the included universal mounting hardware, the awning can be easily attached to the vehicle. Two guy ropes make securing it simple, while the robust construction ensures long-lasting stability.

- **EXPANDABLE INTO A PROTECTED SPACE**

With the additionally available tent room, you can quickly transform your awning into a sheltered, nearly enclosed space – ideal in wind, rain, or when you want more privacy at the campsite.
