### Color

**Grey**      **Grey** 

### Price

**799 €**      **999 €**

#### • COMPACT SOFTCOVER DESIGN

The durable 700D composite cover with EVA coating reliably protects the awning during transport. When closed, it features a particularly compact design with minimal wind resistance – ideal for SUVs, campers, and urban vehicles.

#### • INTEGRATED LED LIGHT STRIP

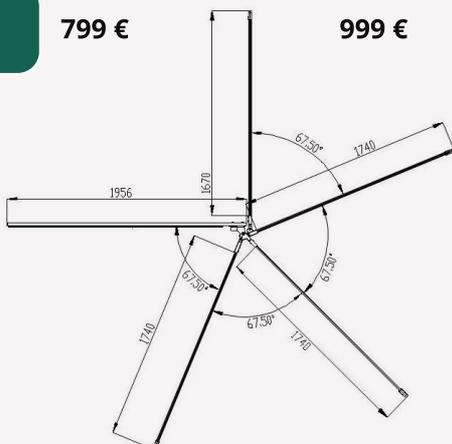

The integrated LED lighting provides functional illumination and a pleasant atmosphere at night. Whether cooking, organizing, or relaxing together, your outdoor area remains perfectly lit.

#### • SET UP IN SECONDS

Thanks to its innovative mechanism, the awning is ready to use in under a minute. Simply unfold and extend – done. The self-supporting construction ensures stability even without additional poles, while telescopic poles can be used optionally if needed.

#### • EXPANDABLE INTO A PROTECTED SPACE

With the additionally available tent room, you can quickly transform your awning into a sheltered, nearly enclosed space – ideal in wind, rain, or when you want more privacy at the campsite.
