CLASSIC FOLDING TENT

Folding tents consist of two floor halves that are folded out over the long side. When opened, they resemble normal tents. the tent fabric folds out over the tent frame during assembly. Folding tents are characterised by sufficient space, a great feeling of space and generous windows. Our folding tents are available in different sizes so that there is enough space for the whole family.

ADVANTAGES

- very spacious, covered space next to the vehicle
- generous lying surface
- great sense of space thanks to large windows and interior height
- lighter than Hardshell tents
- compact pack size when folded
- inexpensive

HARDSHELL TENT

When folded up, they look like roof boxes. Assembly and disassembly is quick and easy. They are raised in no time at all using compressed air springs. Do you want to be flexible when travelling and have your roof tent set up and taken down in no time at all? Then a Hardshell tent should be your first choice.

ADVANTAGES

- Very easy and time-saving assembly and disassembly
- smaller tent fabric panels, therefore less damp and clammy in bad weather
- smaller pitches are sufficient, as the roof tent does not extend beyond the roof when unfolded
- Vehicle protrudes
- robust hardtop

HYBRID ROOF TENT

When folded up, they are disguised as Hardshell tents, but when pitched they are similar to folding tents. In other words, the hybrid roof tent combines the properties of a folding and Hardshell tent. Easy to set up and take down, small pack size, a solid outer shell when packed and still the largest possible sleeping area. A hybrid roof tent offers you all of this.

ADVANTAGES

- robust pack shape
- aerodynamic design
- quick assembly and dismantling
- smaller tent fabric panels, therefore less damp and clammy in bad weather
- more space and sleeping area than a Hardshell tent

VICKY VILLAGE

Would you like to see our roof tents live? Then drop by one of our showrooms.

VICKY VILLAGE AUGSBURG

VICKY VILLAGE HANNOVER

VICKY VILLAGE POTSDAM
