## FOLDABLE ROOF TENTS

Foldable rooftop tents generally consist of two plates that form the floor of the tent by unfolding it via the long side. The fabric is unfolded automatically by the framework. Once standing, foldable rooftop tents are similar to regular tents when it comes to looks. Characteristically, those tents are incredibly spacious and thanks to their many windows offer an incomparable view. We offer a multitude of sizes so no matter how big your family is, we certainly have the right rooftop tent for you.

## BENEFITS

- very spacious, protected space next to vehicle
- huge reclining surface
- amazing sense of space created by windows and increased inner height
- less weight
- compact when folded for transport
- less expensive

## HARDSHELL ROOF TENTS

When not in use they look like transport boxes. Setting up a tent can not get any easier or faster. Our pneumatic springs open the tent within seconds – no external power needed. If you want to stay flexible and get back on the road in no time, a hardtop tent might be right up your alley.

## BENEFITS

- easy and fast set-up
- less fabric, therefore less clammy in humid surroundings
- less space needed on the side of the vehicle
- robust, high-quality hardtop

## HYBRID ROOF TENTS

Camouflaged as a hardcover when not in use, spacious and big lying surface when set up. To hit the nail on the head hybrid tents combine all the advantages of the previous types of rooftop tents. They are incredibly easy to set up, offer a lot of space yet still stay compact when folded together and they are protected by a hardcover. If you are looking for a rooftop tent and want to have all the possible advantages, look no further than the Hybrids.

## BENEFITS

- robust packaging
- big space and lying surface
- fast set-up
- protection allows to keep it mounted during all four seasons
