

INSTRUCTIONS

AIR PRO Roof tent mattress

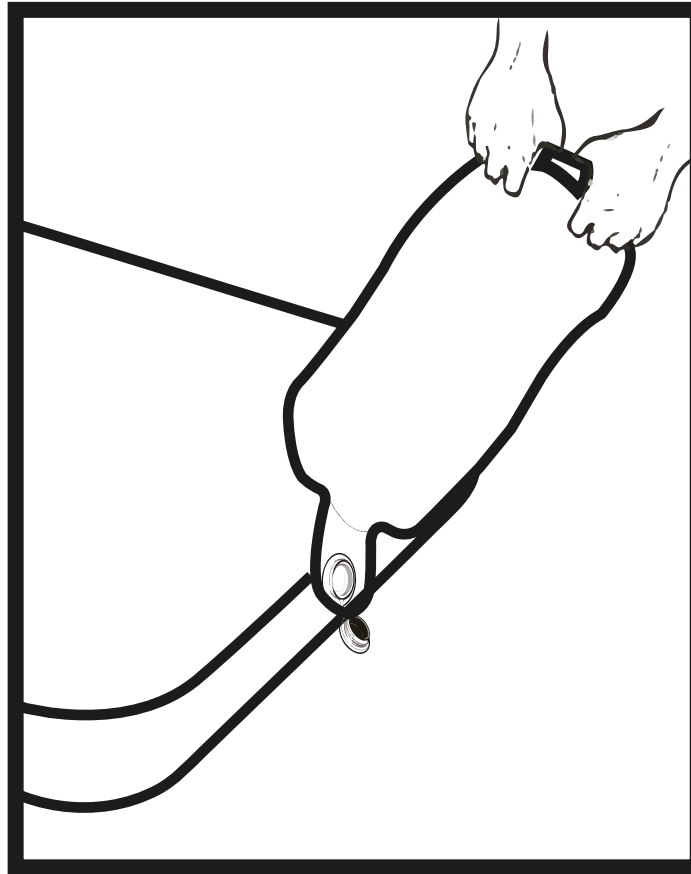

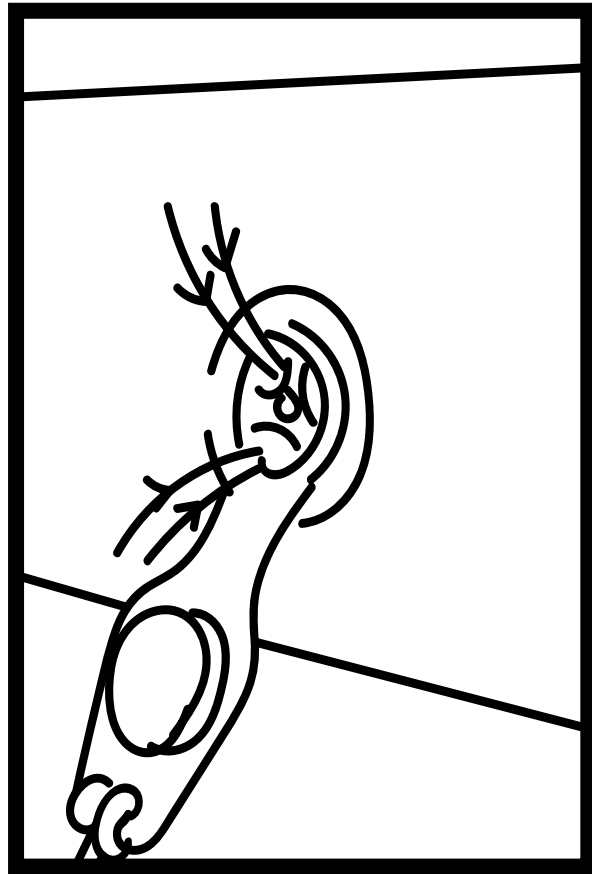

Size: 160 x 240 cm

ASSEMBLY / AUFBAU

To obtain softness, open the cap to release air until the mattress has reached the desired firmness.

To obtain extra firmness, blow air into the valve by using a pump bag until the mattress reached the desired firmness.

**Rotate the valve to
inflate**

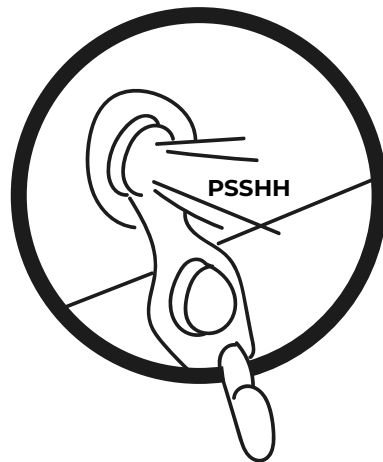

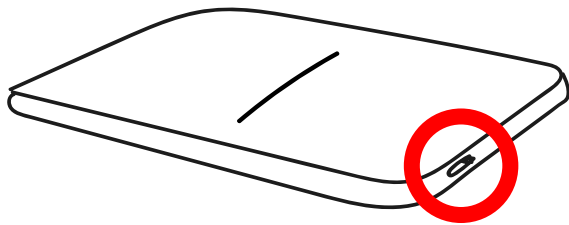

**The inflate side
(Air can only get in)**

DISMANTLING / ABBAU

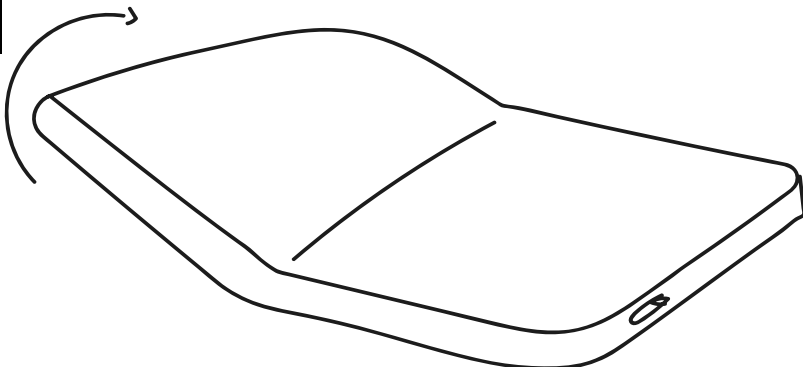

VARIATION 1 - Keep mattress inside of roof tent after folding like shown on number 2.

1

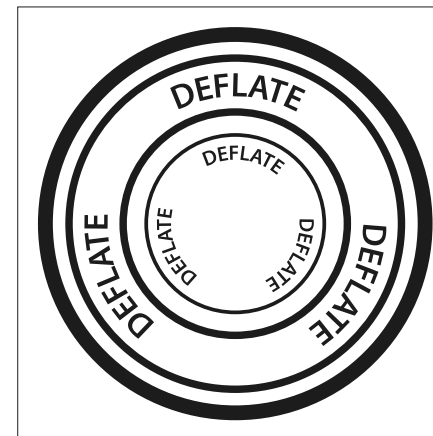

Fully open the cap by turning counter-clockwise and keep valve at deflating position.

2

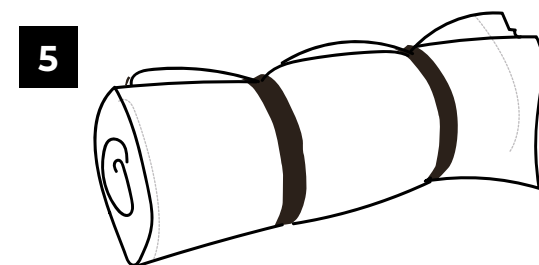

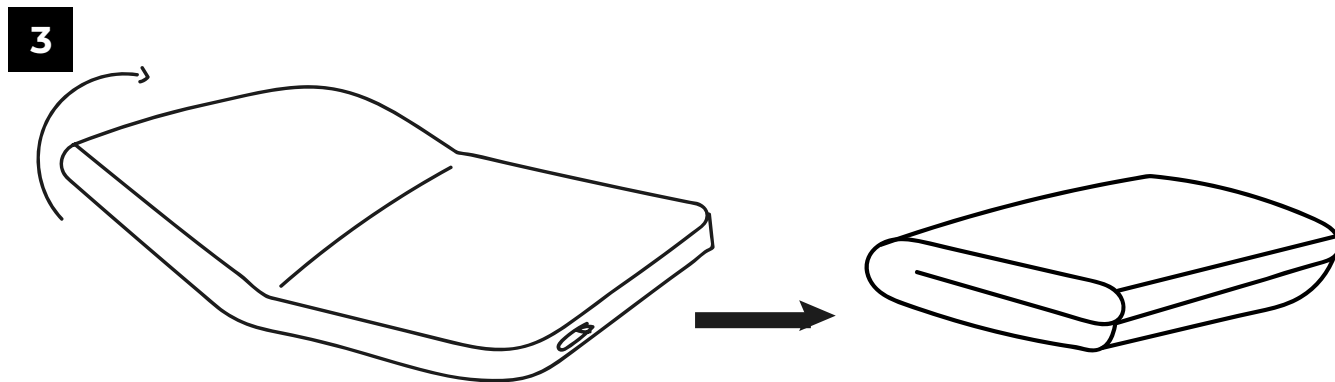

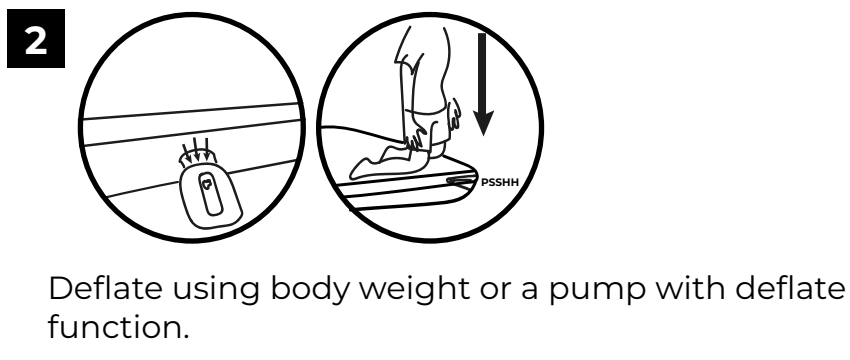

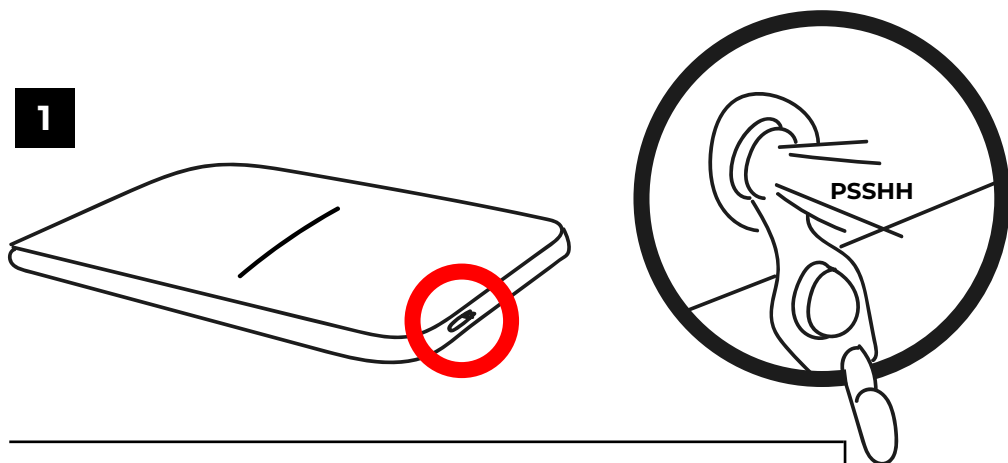

**Rotate the valve to
deflate**

**The deflate side
(Air can only get out)**

VARIATION 2 - Take the mattress out of roof tent, roll it up and store it somewhere else.

Caring for your mattress:

1. To maintain the highest performance from your mattress, store it flat and with the valves(s) open. This will maintain the foam at its fully expanded potential. This will also allow any moisture trapped in the interior to escape.
2. If you pad must be stored in a rolled condition, please inflate the the mattress as frequently as possible, to prevent the foam from developing a compressed memory.
3. To avoid mildew, never store your mattress in a damp or wet location. Also, be sure both surfaces are dry before storing.
4. To clean your mattress, use mild soap and warm water. Be sure to close the valves(s) when cleaning to avoid getting any water into the mattress. Let it air dry.
5. Never place your mattress on sharp or abrasive surfaces, such as rocks, branches, pine cones, and pins and needles.
6. Avoid using your mattress in a swimming pool as the chlorinated water will adversely affect the exterior fabric. Do not use an air pump to over inflate the mattress as it may cause irreparable damage.
